Summary

Software Engineer with 1.5 years of experience in Java and Spring Boot, building automation tooling and requirements-driven test infrastructure for cloud-native Software Defined Vehicle platforms at Tata Elxsi. Skilled in REST API development, Redis caching, SQL optimization, and production support. Strong foundation in Core Java, OOP, Multithreading, Collections, and JVM concepts. Currently advancing enterprise system design through CDAC ACTS Pune's Advanced Computing program.

Education

- CDAC ACTS, Pune** MH, India
Post Graduate Certification in Advanced Computing (PGCP-AC) Feb 2026 – Present
- MGM's JNEC, Chh. Sambhajinagar** MH, India
Bachelor of Technology – Information Technology (GPA: 8.75) 2019 – 2023

Experience

- Tata Elxsi** Hyderabad, IN
Software Engineer Jan 2024 – Jul 2025
 - Java & Spring Boot Development:** Built automation scripts and REST APIs for a cloud-native SDV platform, reducing manual BMS verification time by 30%.
 - Redis Caching & Performance Optimization:** Integrated caching layers to optimize API response times and reduce external calls.
 - Requirements-Driven Testing:** Authored SRS-based test cases for Indian Railways' Kavach (TCAS) collision avoidance system, ensuring SIL-4 safety compliance.
 - Production Support:** Performed log analysis and issue resolution for deployed services, improving system reliability.

Projects

- Weather API with Cache** Java 17, Spring Boot, Redis, Docker
Backend REST API Service – github.com/shubd-dev/WeatherAPI_cache
 - API Integration & Caching:** Integrated Visual Crossing Weather API and added Redis caching, cutting external API calls by 70% and reducing response time from 800ms to under 120ms.
 - Containerization:** Dockerized the full service with docker-compose (Spring Boot + Redis), enabling consistent local environments.
- LearnHub – Digital Learning Platform** React.js, Spring Boot, MySQL
Full-Stack Web Application – github.com/team-group-no-7
 - REST API Development:** Designed and implemented backend services with Spring Boot and Hibernate for user management and payments.
 - SQL Optimization:** Implemented efficient queries and indexing strategies to improve database performance.
 - Admin Dashboard:** Built a central admin panel for monitoring users, content, and revenue.

Skills Summary

- Languages:** Java , SQL, JavaScript
- Frameworks:** Spring Boot, Spring Framework, Hibernate, React
- Databases:** MySQL, Redis
- Tools:** Docker, Linux ,Maven, Git, GitHub, Postman, Jira, IntelliJ IDEA, Eclipse
- Concepts:** Core Java, OOP, Collections, REST APIs, Agile

Certifications

- AWS Cloud Technical Essentials:** Completed certification covering AWS core services, cloud concepts, and practical usage.
